agxintl®
CONSULT | INNOVATE | TRANSFORM

AGXINTL is a global provider of IT services. With our vast experience in managing large IT projects for our clients across the world, our focus is exclusively on maximizing client returns from outsourcing and off-shoring. Our enterprise-class solutions help our customers to optimize their technology investments and accelerate the business growth.

AGXINTL 's domain expertise and seasoned global delivery model helps in providing most cost-effective and comprehensive, end-to-end, solutions. With strategically located global delivery centres across Australia, India and SriLanka, we deploy proven project collaboration tools, consistent processes and a well-planned delivery methodology to help you transform your business by giving you greater flexibility, higher efficiency and lower costs.

AGXINTL is recognized for its comprehensive portfolio of services and for its practical approach to innovation. We believe in being a trusted partner and a co-innovator in our customer's journey to rapidly respond to the changing market needs. We hire the best talent in the industry and give them the world class facilities to ensure they leverage their skills to help our customers grow.

Our portfolio of services

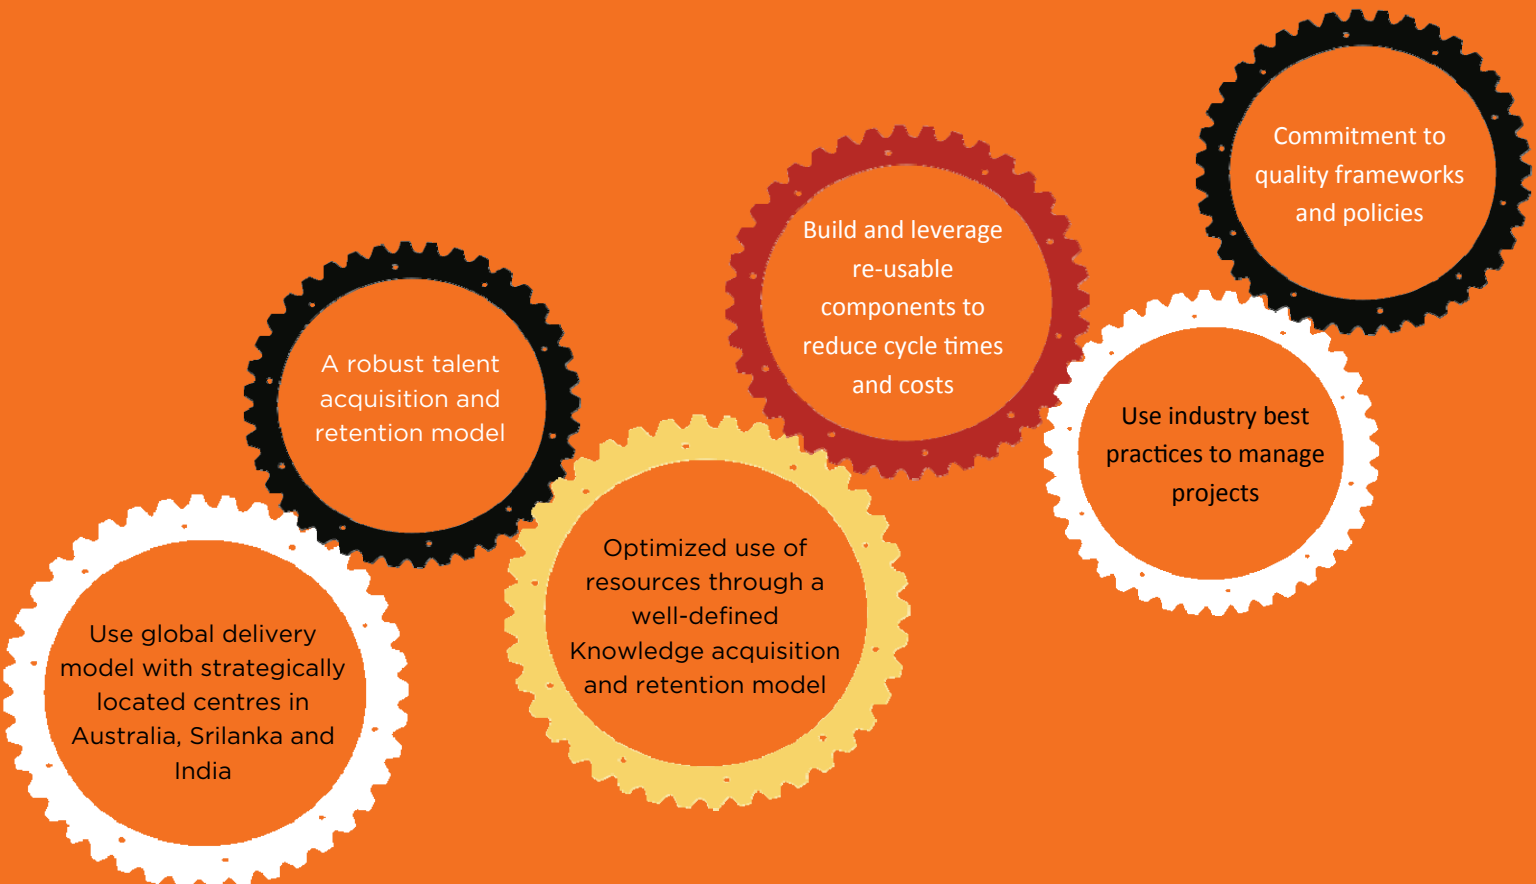

Application Outsourcing Services (AOS)

We very well understand that applications drive your business processes and hence managing a vast set of heterogeneous application environments are increasingly challenging. It is imperative to optimize your IT investments to reduce costs and drive business growth. Through our application outsourcing service, we provide application development, maintenance and support to help you align your IT investments with your business needs.

Labour arbitrage has been the sole driver of Application development and maintenance outsourcing and when coupled with an efficient offshore-onsite delivery model, it delivers

maximum benefits. Our distributed delivery methodology will help leverage our talent pool spread across our global delivery centres to develop and maintain your enterprise applications end-to-end. We adhere to stringent quality assurance policies where every stage of the application development process is monitored, reviewed, audited and measured. Our proven frameworks are designed to accommodate a seamless flow of associated tasks like application change request, performance fine-tuning, up-gradation, bug fixing and other similar requirements.

Our Unique Value Proposition

Professional Outsourcing Services (POS)

POS is an on-demand specialized service that gives you a flexible option of employing skilled resources either at our facilities across Australia, Srilanka and India or at your facilities anywhere in the world. This team will be an extension of your existing team on demand. These resources are certified professionals in their domain of expertise and have full access to our technical knowledge base. This model is a perfect way to accomplish your special or seasonal project requirements without adding permanent staff.

Some significant benefits are:

- Highly qualified and experienced personnel to suit your exact requirements.
- Faster identification and on-boarding of resources.
- Flexibility to swap, add, remove resources based on the project needs.
- Option to choose from various mixes of models across number of resources, tenure and expertise.
- Access to a large technical knowledge bank, quality processes and delivery frameworks.
- Maintain cost reduction and time-to-market.

Our Flexible Engagement Models

SOW Basis

Based on your fixed price budget for a specific statement of work, we will provide required number of technical resources for a fixed period of time.

Time & Material Basis

This is also commonly referred to as staff augmentation. Our technical resources will work as your extended staff either at our facilities or your facilities for the duration of a contract term.

SLA Basis

We can also provide managed staff augmentation services with service level agreements which will help you to focus more on the projects and less on resource hiring, training and management. We will also provide a smooth transition with knowledge transfer of these resources at an appropriate time as per need.
